What is a Active Optical Cable (AOC)?

Using DACs, the transition between the modules (here QSFP28) and the chips in the larger systems is copper to copper. On the active optical cable, we have the fixed optical pathways

[Read More](#)

What Are Optical Switches and How Do They Work?

An optical switch is a device engineered to selectively redirect incoming optical signals from one fiber-optic input port to a chosen output port. Its primary function is to route data carried by
