

Which size of distribution box is best

Overview

The size of a distribution box depends on your circuit capacity and power requirements. For residential spaces, smaller boxes with 4 to 16 circuits may suffice, while commercial and industrial settings may need larger boxes with 20 or more circuits to accommodate higher power. We'll chat about what each one does, where it shines, and then dive into how to choose the perfect box for your needs. I've learned that understanding these factors is crucial for a safe and efficient electrical.
