

Which way should the fiber optic cable run along the tower

Overview

For all fiber trunk cables and fiber jumpers, which do not run in conduit, we recommend fixing them at intervals of 0,80 -1 meter vertically and 1 meter horizontally. Only clamps with appropriate diameter are used to fix the cable to the structure. Installation works shall be accomplished according to the general guidelines for fibre-optic cable and connectors. Fiber optic cables have Kevlar aramid yarn or a fiberglass rod as their strength member. This DIY effort is undertaken to maximize performance, improve aesthetics, or relocate the Optical Network Terminal (ONT) to a. Deploying fiber above ground on poles or towers removes the need for underground digging and is particularly useful when the ground is uneven, rocky or both.
