

Why are there 5 wires on the top busbar of the cabinet

Overview

Electrical busbar systems (sometimes simply referred to as busbar systems) are a modular approach to, where instead of a standard cable wiring to every single electrical device, the electrical devices are mounted onto an adapter which is directly fitted to a current carrying. This modular approach is used in, panels and other kinds of installation in an electrical enclosure.

Why are there 5 wires on the top busbar of the cabinet

Busbar

In a traditional control panel, wire sizes are constrained and there is limited or possibly no room for future expansion. Even if expansion is an option, it is often only achieved through very difficult and
