

Wiring of main and branch lines in the distribution box

Overview

Wiring Direction: Wiring between the main circuit breaker and each branch circuit breaker in the box generally goes on the left, and the wiring out of the distribution box generally goes on the right. Correct wiring methods for circuit breakers within distribution boxes are fundamental to ensuring electrical safety and compliance with established codes.

Wiring of main and branch lines in the distribution box

The Main Electrical Panel & Subpanels

Branch circuits originate at a service distribution panel--either a main panel or a subpanel. For a deeper dive into electrical panels, see Electrical
